***Response to Amendment***

1. The amendments filed on July 28, 2003 have been entered and made of record.

***Response to Arguments***

2. Applicant's arguments with respect to claims 1-14, 16-24 have been considered but are moot due to restriction/election requirement.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-14, 16 and 21-24, drawn to a timing system for controlling timing of data transfers within an embedded semiconductor, classified in class 365, subclass 233.
  - II. Claims 17-20, drawn to a bias circuit for a timing system of an embedded semiconductor memory system, classified in class 365, subclass 230.06.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the biasing circuit for a timing system of an embedded semiconductor memory can be replaced with any circuit that conventionally known and used; and the subcombination has separate utility and does not contain the same limitations as claims in Group I as stated by the Applicants in the remark. Therefore, the restriction is required due to an application is having two different inventions.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
